

PRO-218A

Instrument Microphone

Description

PRO-218A is special designed for bass drum miking, through repeated practice and improvement, a long time R&D process spent over 12 months. Its tailored response, specific magnetic structure and vibration system are quite different with others, it possess very wide linear dynamic range by very high SPL endurance unacceptable to usual microphones. PRO-218A is fit to use for bass drum or other bass instrument miking, a nicefull sound effect contains overtone of string or leather tympan will be obtained.

Features

- Specific soft and strengthen low frequency response.
- Low disturbance when impedance varies, high gain before feedback.
- Low noise. High SPL endurable
- Fit to use for bass drum, kickdrum or other wide dynamic range instrument miking.
- Portable suitcase packaged.

Specifications

- Polar Patterns: SuperCardioid
- Frequency Response: 20~10000Hz.
- Sensitivity: -64dBV/pa (0.36mv/pa)
- Rated Impedance: 450
- Max. SPL: 174dB (THD Q1% 1000Hz)
- Dimensions: 58x140mm
- Net Weight: 350g (less cable)

Frequency Response
